KUHLOW GIRLS SHOWPIGS

BRINGING HOME THE BACON

Kuhlow Girls Showpigs is a family operation consisting of Chelsea, Courtney and Kallista Kuhlow (with a little help from our dad, Darin R Kuhlow). Our goal is to provide our customers with championship-caliber, **HEALTHY**, problem-free showpig genetics. Our idea of a great hog is one that is healthy, sound, free-moving, attractive, and muscular with adequate frame, width, bone and leanness. We emphasize soundness, structure and **BALANCE** above all else. We like hogs that are always in style, no matter which way the trend swings. We believe that a hog that is fundamentally good will always be fundamentally good.

Our goal is to create one of the nation's most elite sow herds. Our herd currently consists of Yorkshires, Durocs and Exotics. We began our sow herd with the purchase of weanling gilts from our dad's company, Limit Up, Inc. and subsequently added a few select females from Olsen Yorkshires and Cedar Ridge Farms. The Limit Up herd originated in the early 1990's with breeding stock from an SPF-health genetics provider and developed winning showpig lines which produced many champions at the county and state levels.

Our Yorkshire females can be traced back to some of the most prolific maternal Yorkshire lines of the 80's and 90's including the original Swedish imports made by SGI and others. Many generations of selection and breeding with modern showpig sires have given our Yorkshires that winning phenotype, yet they still possess the maternal characteristics of their heritage.

Our herd maintains the original health status, being free from PRRS, mycoplasma pneumonia, APP, lice, mange and many other diseases. We follow strict health and bio-security protocols to maintain our herd health status. In addition we incorporate the most modern production practices to maximize our herd's potential and are always willing to help our customers achieve success with our genetics. Contact us any time if you have questions about our genetics, health or production practices.

2016 HAS BEEN A GREAT YEAR AT KUHLOW GIRLS SHOWPIGS!

Another class-winning boar at a national event and reports pouring in from across the country of winners raised by us and sired by our boars. We'd like to sincerely thank all the customers who have shown confidence in us and our breeding program. We'll always do our best to provide you with genetics that can help move your program forward and into the winner's circle. We'll also be here to support you after the sale. Don't hesitate to contact us if there is anything we might be able to help with.

Please take a moment to browse through our herd sires. Each of these boars was selected

for placement in stud because they have a place in our own breeding program. High-quality semen is available for sale from each of them throughout the year. Feel free to call us with questions if you think one of them might offer some benefit in your herd. We follow strict health and bio-security protocols. We manage the boars and collect and process semen by the most advanced industry standards. Our health-safety and sperm-quality will match or exceed the best in the showpig industry. You can use our boar semen with confidence.

EXCLUSION OF WARRANTIES, RESTRICTION OF REMEDIES AND LIMITATION OF DAMAGES

Although artificial insemination is a unique concept, it is generally successful in the breeding of livestock. However, Kuhlow Girls, Inc. cannot control nor be responsible for the conditions in which its boar semen ("product") is used or the techniques used in the application thereof. Kuhlow Girls, Inc. makes no warranty of any kind, expressed or implied, as to the quality of its product, its productiveness, or the results which may be obtained by its use. No employee, agent, or servant of Kuhlow Girls, Inc. shall have authority to make any such warranty in any form. Kuhlow Girls, Inc. MAKES NO WARRANTY OR MERCHANTABILITY OF THE PRODUCT, AND NO WARRANTY, EXPRESSED OR IMPLIED, OF THE PRODUCT'S FITNESS FOR ANY PURPOSE.

If there is any failure in the delivery or delay in transit, or if the product is lost, damaged, or determined to be defective, Kuhlow Girls, Inc. may at its option replace the product or refund the purchase price. The liability of Kuhlow Girls, Inc. shall in any event be limited to either replacement of the product or refund of the purchase price and shall not extend to any other claim or liability whatsoever. In no event shall Kuhlow Girls, Inc. be liable for consequential or incidental damages.

DECIDEDLY DIFFERENT 69-1

DOB: 7/02/14

SIRE: DECIDEDLY DIFFERENT (LEAN VALUE SIRE)

DAM: **STARBUCK X
GATEMASTER X TANK**

We are proud to introduce our Yorkshire herdsire Decidedly Different 69-1. This boar is unlike just about anything you'll find in the Yorkshire breed. Small-framed and busted **WIDE OPEN**. Huge barrel rib, enormous chest, big, deep, grooved top, loaded with muscle. Big feet with great bone and not down on his pasterns. He is a Yorkshire barrow sire supreme.

Sired by Decidedly Different at LVS (Untouchable x Moonshine 72-4 (Brinning)) out of a great young Starbuck sow at KGS, this guy has success bred into him! The Gatemaster x Tank grand-dam was a cornerstone for our Yorkshire herd. Muscle is bred all the way through this pedigree.

We had hoped to take 69-1 to Belton last year where we felt he would be seen as a true difference-maker in terms of siring winning Yorkshire barrows. In the end, we were just too busy to go and put him in our own stud instead. He may not be right for every breeder, but he is built like a champion barrow. If you want to make breeding gilts with him, protect him just a bit on frame size (take him to your taller, slightly larger sows). If you want to make championship barrows with him, breed the farm to him! No more worries about narrow, stringy Yorks, or fat, heavy-structured Yorks with no true muscle-shape. This guy has your answers. Reports are rolling in of winners he's sired both purebred and crossbred from all around the country. The most recent at the time of this printing is the Supreme Champion at Jefferson County (WI). You'll struggle to find another Yorkshire sire that makes barrow-oriented Yorks and crosses like this guy. We've used him heavily and we'll continue to do so. Limited semen availability. Please call to book in advance.

\$200/DOSE  **STRESS NEGATIVE**

GOIN' GREEN

NON-PEDIGREED PUREBRED YORKSHIRE THUNDER UP X BIG EASY X TANK

BREEDER: KUHLOW GIRLS

After 3 years at Showtime Sires, Goin' Green has found his way back home! By now you've probably heard the story. Goin' Green lit up the barn at Louisville in 2013, grabbing the attention of many of the breed's most prominent breeders at the Summer Type Conference. Hours before the sale, a discrepancy in his underline resulted in the loss of his pedigree.

Since that time, he's resided at Showtime Sires where he has produced many crossbred champions across the country as well as countless big-time showpig mommas. At 3 ½ years of age, he still looks awesome and he can be as relevant today as ever! I know that "old" boars are not popular and there are a lot of new young studs out there to choose from.

Do yourself a favor and tap into a PROVEN showpig sire that can make outstanding females for your herd, barrows for the show ring and killer Yorkshires for the southwest where no pedigree is needed.

\$75/DOSE  STRESS NEGATIVE

BRICK 123-2

SIRE: LUPI DECIDEDLY DIFFERENT 69-1
HOUSED AT KUHLOW GIRLS, INC.

DAM: CARBON FOOTPRINT X
THUNDER UP X TANK

BREEDER: KUHLOW GIRLS

123-2 (Brick) is a Yorkshire barrow-sire supreme! He, his half-brother "Pipes", and his sire will redefine the role of Yorkshires in the barrow world.

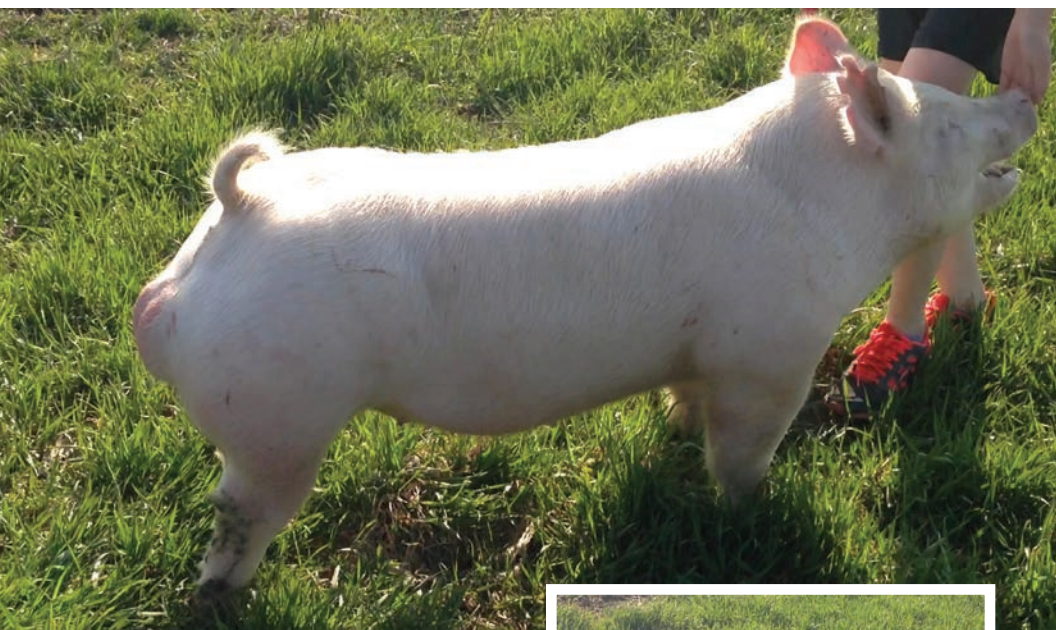

With muscle that can compete with the crosses, this guy will add top-shape, ham and base-width while

still offering some length of body, tallness of front and that jet-level, beautiful profile. No longer will purebred Yorks take a back seat to the crossbreds in the grand barrow drive.

\$150/DOSE  **STRESS NEGATIVE**

PIPES 121-1

SIRE: LUPI DECIDEDLY DIFFERENT 69-1
HOUSED AT KUHLOW GIRLS, INC.

DAM: **THUNDER UP X**
CLIFFHANGER X RA

BREEDER: KUHLOW GIRLS

Whoa! Look out! Pipes will blow you away with his extreme width and muscle. Big, full, bulging ham and stifle. Big, deep, grooved top. Huge, ripped blades. Big, wide chest and big rib. Super-wide and super-square, no bowed hocks or knees here!

This guy will make impressive barrows from even the plainest of sows. Is he perfect? No. Protect him on length of body and length of neck. Take him to a looser-structured, longer-striding sow. With all the natural mass and shape, he does get a little tighter and shorter-strided than ideal. Still up-headed and tall at the point of the shoulder, use him to make a big step forward in width and muscle without losing squareness, style and profile.

\$150/DOSE  **STRESS NEGATIVE**

CARBON FOOTPRINT 130-6

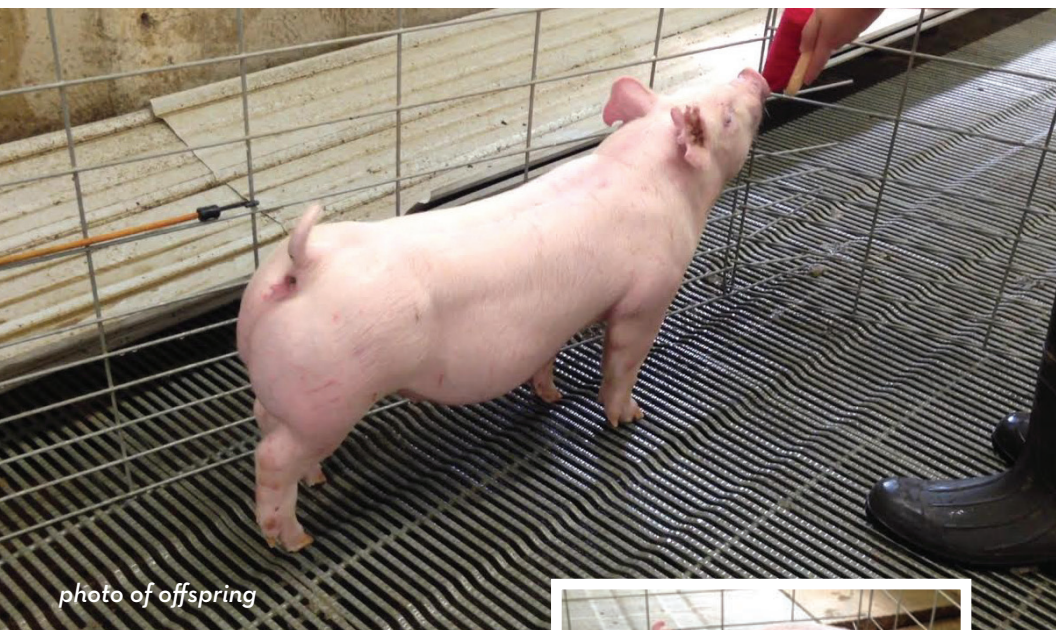

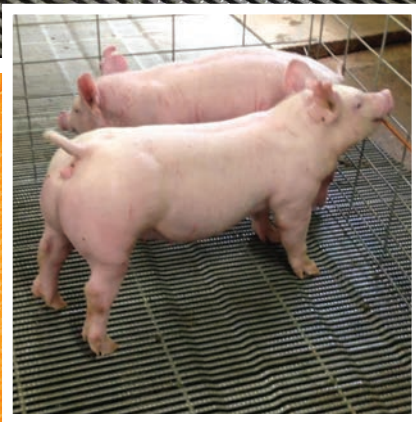

photo of offspring

CARBON FOOTPRINT 7-2 X LEGAL LIMIT X DAY TRIPPER

BREEDER: KUHLOW GIRLS

130-6 is our best son of Carbon Footprint (Goin Green's brother). Muscle, bone, width, body with that extra extension up front and that killer profile. This guy is a show hog! We never got a picture of him, but we can show you what his offspring look like, which is really what matters anyway!

130-6 has an outcross pedigree as compared to most of the current popular Yorkshire genetic lines and will work on a variety of females. Really balanced sire that will get you in the winner's circle. His first pigs were born in April 2016. By the looks of them, we'll be using him a bunch more!

\$100/DOSE  **STRESS NEGATIVE**

SKULL 127-8

photo of offspring

SKULL X THUNDER UP X CLIFFHANGER

BREEDER: KUHLOW GIRLS

127-8 is our best son of Skull. Here's another one with a different pedigree than most of the current popular boars. This guy is a stout, big-boned, big-ribbed monster. Great muscle-shape, base-width and a balanced design, use him to stouten up hogs on your females that need a little more structure without sacrificing look and design.

He's just getting a start here at Kuhlow Girls. Look for big things from him in the future!

\$100/DOSE  **STRESS NEGATIVE**

FertiMaxx™ extender was developed and designed to improve the number of fertile sperm cells in a dose of semen, allowing for semen to be processed with fewer cells per dose while still achieving maximum fertility. While other boar semen extenders utilize compounds which inhibit the sperm cell's ability to capacitate, FertiMaxx™ was designed to reduce, replace or eliminate those compounds which inhibit capacitation. The result is that a higher percentage of sperm cells in a dose of semen have the ability to fertilize.

FertiMaxx™ is a new-generation extender, providing seven to eight day fertile storage life, advanced cold-shock protection, and improved post-insemination capacitation all in a completely non-foaming, easily-dissolved formula. This allows producers to successfully inseminate sows with less sperm cells while achieving maximum fertility and getting the most use from their very best genetics.

Achieve **maximum** fertility.

KGS ANTE UP 72-8

DOB: 8/20/15

SIRE: ANTE UP

DAM: FULL STRUT

BREEDER: STOHLQUIST

The sire of this guy needs no introduction. Ante Up has been winning everywhere and has been one of the most successful sires in the past year. This guy's dam is a Full Strut out of Stohlquist's old Super Natural sow that has been a cornerstone of their breeding program.

We love 72-8 for his trendy look, being tall-fronted, extended up front with a ton of body and muscle to burn! Wide-based, big-chested and plenty of bone make this one an excellent choice to use on your negative cross females or on Yorkshires to make York-appearing barrows.

\$150/DOSE (\$75 OFF-SEASON)  **STRESS CARRIER**

KGS ANTE UP 72-10

DOB: 8/20/15

SIRE: ANTE UP

DAM: **FULL STRUT**

BREEDER: STOHLQUIST

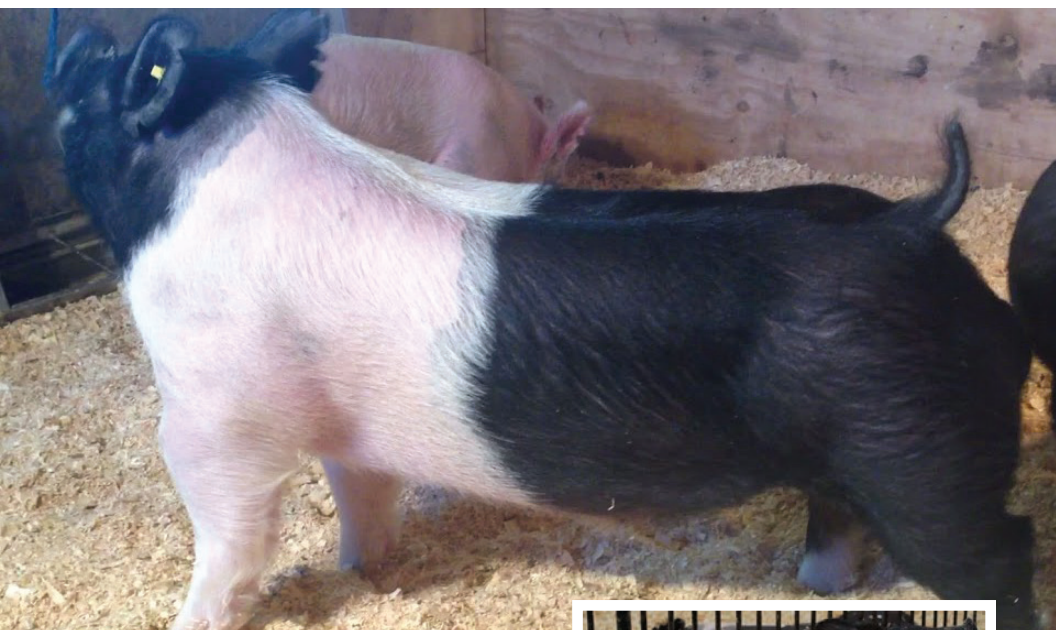

The sire of this guy needs no introduction. Ante Up has been winning everywhere and has been one of the most successful sires in the past year. This guy's dam is a Full Strut out of Stohlquist's old Super Natural sow that has been a cornerstone of their breeding program. Ante Up 72-10 is going to see heavy use here at Kuhlow Girls Showpigs!

This guy has the look and design we strive to get in our crossbred show barrows. Tall-fronted and stylish, with great profile and balance. Great base-width, chest, rib, blade and the right length of body for the trend without sacrificing the heavy muscle we like to keep in our program. His color markings would imply that we can get a high percentage of colored and chromed-up pigs as well as some hamp-appearing crosses for the southwest. We have high expectations for this guy!

\$150/DOSE (\$75 OFF-SEASON)  **STRESS NEGATIVE**

KGS ANTE UP 87-4

DOB: 8/24/15

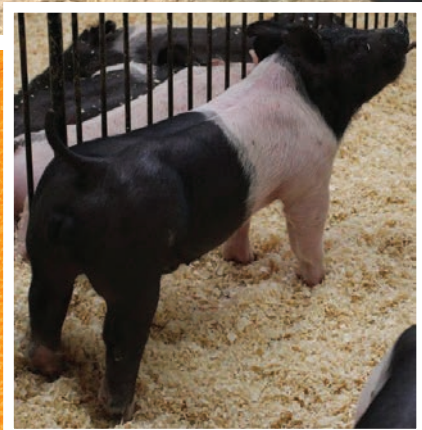

SIRE: ANTE UP

DAM: BIG PAPPY

BREEDER: STOHLQUIST

The sire of this guy needs no introduction. Ante Up has been winning everywhere and has been one of the most successful sires in the past year. This guy's dam is a Big Pappi who has been a great producer at Stohlquist's. She raised the champion heavyweight crossbred at Fort Worth last year, as well as the 2nd place behind the reserve heavyweight crossbred.

Ante Up 87-4 compliments our other Ante Up sons nicely having that same "Ante Up" look in a slightly more extended package with a different pedigree on the dam's side. Big top, big blade, tall-fronted with that heads-up attitude, he's a tick longer-bodied than our other Ante Up sons. Still brings plenty of bone, style and muscle to the equation with that Ante Up body. We plan to use this guy on our sows that are getting a bit too short-coupled for the current trend, and on any females where we want to add a bit more extension, look and pretty profile. This guy can be a difference maker!
